Microsoft Teams Phone Standard

Microsoft 365

Collaboration

Simplify communications by unifying calling with chat and meetings in Microsoft Teams. Contacts and calendar are integrated to take collaboration to the next level by using all the features in one, common interface across devices.

Professional-Grade Phone System

Reliable and secure calling delivered in a feature-rich phone system which allows for the complete replacement of a traditional phone system. Plus, AI with voicemail transcription, inline chat translation, and real-time captioning in meetings.

Built-in Audio Conferencing

Add Audio Conferencing and reduce disparate conferencing solutions while adding flexibility to meetings. There's no downloads or endless digit entry and it's safe and secure; just click to meet!

Keep Existing Numbers and Devices

Retain existing numbers and add new as needed. Make calls and join meetings with one-click across the client, web browser, mobile device, headset, and/or desk phone seamlessly with a single phone number.

Secure and Redundant

Keep business secure and running smoothly with an end to end solution. Built for elastic scale with redundancy and load balancing. HIPAA, PIA, GDPR, FedRamp, Tier-D Security, ISO 27001, ISO 27018, SSAE16 SOC 1 and SOC 2, and EU Model Clauses (EUMC) compliance.

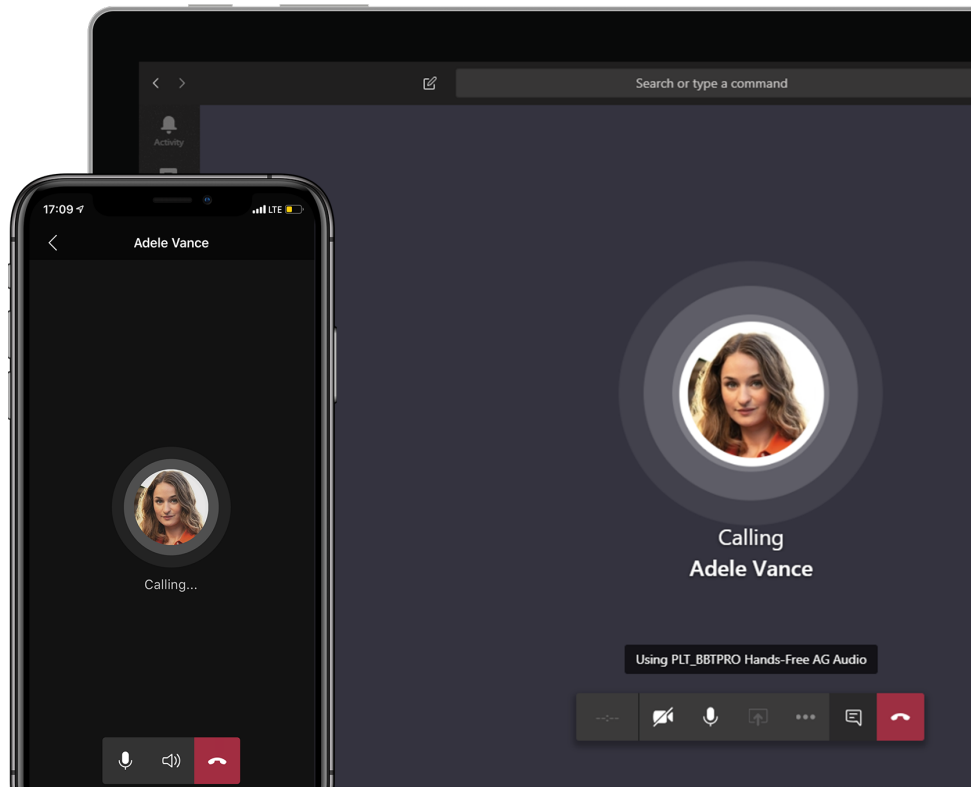

Built for Productivity

Microsoft Teams Phone Standard is a cloud-based phone system built for productivity.

It integrates into Microsoft 365 for an all-in-one communication solution that brings together calling, meetings, and messaging into a single application, Microsoft Teams.

High-quality, reliable calling

Keep your business running smoothly with built-in redundancy and active load balancing for a 99.9% uptime guaranteed by Microsoft 365.

Security, privacy, & compliance

Protect your business communications, no matter where they take place with built-in security, privacy, and compliance from Microsoft 365.

Scalability to grow as you do

Scale your phone system by getting new numbers and adding users as your business grows with Microsoft's global cloud.

Intelligent call management

Work together to handle calls and voicemails, so no requests fall through the cracks with multi-level auto attendants and call queues.

AI-powered transcription

Easily listen to or read your transcribed voicemails from any computer, smart phone, desk phone, or your inbox.

Microsoft Teams Phone Standard

Calling, chat, and meetings in a single app

Simplify your communications by unifying calling with chat and meetings in Microsoft Teams. Your contacts and calendar are connected across Teams and Outlook. And take collaboration to the next level by using Word, Excel, and PowerPoint within calls and meetings.

Work from anywhere, call on any device

Stay connected with a single phone number across your computer, mobile device, and desk phone. Get a consistent experience across devices with the Microsoft Teams app and Teams devices. Make calls and join meetings with one-click.

The power of voice within a familiar interface. All for one simple fee...

An unique package combining the **reliability of Microsoft Business Voice**, a **generous calling plan** and the award winning **support you trust from Grant McGregor**.

Also included
